

## Why Was This Report Made Available?

The Senate Bill 132, Health Care Consumer's Report, mandates that the Utah Department of Health make health care data more accessible to the public.

The 2006 Pneumonia Hospitalization report is one of a series of mandated consumer reports intended to help citizens and their families become better informed, active participants in their health care.

## TABLE NOTES

**Average Charge:** The average dollars for hospital services for which patients were billed at a particular hospital. The charge does not include physicians' professional fees or patient personal costs.

**Charge differs from cost and how much the hospital actually receives for payment of services.**

Please note that compared to patients with minor/moderate level of illness, patients with major/extreme level of illness are likely to have more serious conditions that require more complex treatment.

**Pneumonia is a serious illness that affects one out of every 100 persons per year.**

## Did you know?

- Pneumonia is preventable. You can protect yourself.
- Pneumonia is often a complication from the flu. Consider getting a "flu" shot from your provider.
- Pneumonia is an important cause of serious illness and death, especially for the very young, elderly and those with chronic lung or heart disease.
- If you or a loved one has symptoms of pneumonia, see your doctor right away.
- The best treatment depends on what kind of pneumonia you or a loved one has.

**Read more in the full report!**  
<http://health.utah.gov/myhealthcare>

**Along with influenza, pneumonia is the 7th leading cause of death in the nation.**
